21 Day Free Trial Offer!

Veterinary laser therapy is both effective and profitable, but before you purchase a laser, we would like to give you the opportunity to decide if it's the right fit for your practice. Here's how our 21 day free trial works:

1. We ship you the Grady Laser along with marketing and educational materials. Class 3b and Class 4 are available and we cover all shipping costs.

2. After you receive the laser, we will be in contact to schedule a 30 minute over the phone training. For comprehensive visual instruction, a training video will also be included with your laser trial. We will be available for follow up questions and support.

3. Once the training is completed, your three week trial begins. This trial period will allow you to evaluate efficacy, client interest, and potential revenue.

4. At the end of the trial you can choose to purchase the Grady Laser (financing is available) or to return it. Should you choose to return the laser, We will email you a shipping label so that there is no cost to you.
